## OBJECTIVE

MCA graduate with strong skills in Java, React.js, and MySQL, focused on building scalable web applications and efficient backend systems. Experienced in developing full-stack projects and responsive user interfaces, with a solid foundation in data structures, OOP, and RESTful APIs. Seeking an entry-level Software Engineer role to contribute to real-world application development.

## EDUCATION

|                                                                                                      |                                  |
